PROFESSIONAL PROFILE

I am a self-motivated, loyal and reliable young man. I completed my Bachelor of IT at Ara Institute in 2017 and would love to pursue my career in IT. My main interest in the IT field is front-end web development as I enjoy the creative side to designing web pages and graphics. I excel in back-end coding because of the problem solving that is involved. I have previously worked with companies creating websites, web apps and logos. I am a hardworking fast learner with proven experience to work well in a team environment. I know I have a lot to offer any employer in the IT industry as I always put my best foot forward.
